

What's it all about?

- SmartsIntegrator allows you to flexibly connect disparate systems and entities, in real-time or batch mode
- It enables you to model and automate your business processes and workflows
- It provides a rich user interface, allowing complex logic to be intuitively configured by drag and drop
- SmartsIntegrator is secure and scalable
- It's built on proven Microsoft technologies – SQLServer, Windows Workflow Foundation, Visual Studio for Applications and the .Net Framework
- An integrated forms designer, with Outlook and SharePoint task integration, provides unique data capture and human workflow support
- Extensive transport and connectivity support is provided out of the box, including legacy formats. SmartsIntegrator can communicate in 40 different ways as standard, including email, web service, (S)FTP, MSMQ, AS/2, database, flat-file, CSV, Xml and WCF
- Sophisticated data transformation capabilities effectively let you connect anything to anything
- Transparent extensibility at every level allows you to extend the application as required
- Comprehensive management and tracking features, and a sophisticated deployment model keep your solution running smoothly over time

What can it do for my business?

- It can make your Software and IT infrastructure work as a whole
- It enables you to replace error-prone and expensive manual processes with automatic workflows, increasing consistency and quality and reducing costs
- It enables you to automate business trading and communications with your customers, suppliers and partners
- It truly enables you to achieve a Service Oriented Architecture (SOA)
- It gives you great visibility into how your business is running on a live basis
- It enables you to replace people, who make mistakes, take excess time to perform simple tasks and demand a salary, with an optimal automated solution that still keeps you in control
- It can optimise your business and help you survive the credit-crunch

Our clients normally achieve a positive return on investment within 12 months!
